Global Business Partner

Company Details

Company Name UNICO ENERGY GROUP CO., LTD.

CEO Yoon Seung-young

Founded April 4, 2024

Employees 7 Headquarters

511 Yeongdong-daero, Gangnam-gu, Seoul (Samseong-dong, Trade Tower)

2nd Plant 64 Secheunggongdan 1-gil, Gimje-si, Jeollabuk-do (Heungsa-dong)

Capital KRW 200 million

Website www.unicoenergygroup.com

Business Areas Crude oil, gas, derivatives, and aluminum ingot (A7), domestic petroleum import/export, non-ferrous metals (copper), IT wholesale & retail

Company's Goal

Korea's leading energy trading and supply specialist company

Seoul Gangnam-gu Samseong-dong Trade Tower headquarters, operating hubs in 5 Asian countries

Petroleum storage at strategic hubs in the Middle East and Asia and logistics infrastructure

Internationally recognized energy company

Specialized in global crude oil, gas, and derivatives trading

End-to-end responsibility from procurement to final delivery

I. COMPANY OVERVIEW

1.1 Corporate Overview

Energy Trading & Supply Chain

We build a competitive global supply chain by trading Crude Oil, Petroleum Products, Natural Gas, LNG and energy derivatives.

Based on strategic networks and storage/logistics infrastructure established in the Middle East, Southeast Asia, and key Asian countries, we operate an integrated process spanning procurement, storage, transport, trading and final delivery, while leveraging AI-based market analysis systems to maximize the efficiency and stability of our energy supply chain.

Logistics and Distribution Infrastructure Platform

UNICO ENERGY GROUP is building a core infrastructure platform to support future industries by advancing energy storage facilities, port logistics networks, industrial complexes, data centers, and integrated infrastructure development projects. We connect our energy supply chain and logistics infrastructure through digital technology to maximize operational efficiency, and are building a sustainable infrastructure ecosystem that can flexibly respond to changes in the global market.

Aluminum & Copper Solutions

Aluminum and electrolytic copper are core raw materials for the EV, battery, power grid, semiconductor, and AI data center industries. Based on our global supply chain, UNICO ENERGY GROUP supplies aluminum ingots, billets, slabs, copper cathode, copper rod, and various non-ferrous metal products, serving as a global raw materials platform connecting major distribution countries and consumer markets worldwide. We also leverage AI-based demand forecasting and market analysis systems to provide customers with stable and competitive supply solutions.

TRADING CHEMICALS & ENERGY

A symphony of astonishing returns forged by capital and assets

Not a dot on a map, but a living global organism — three great hearts

WE are the leading global trader for Chemicals and Energy

We will move forward, looking only ahead

UNICO ENERGY GROUP never stops challenging the world and expanding relentlessly. Beyond energy, resources and non-ferrous metals, we connect new industries and the possibilities of the future, moving forward with our accumulated experience and global network as our strength, toward a bigger world and a higher future.

I. COMPANY OVERVIEW

1.1 Corporate Overview

An Inexhaustible Cash Cow and a Multi-Dimensional Leap Toward a Quantum Jump

UNICO ENERGY GROUP's journey is built on a sophisticated three-tier, multi-layer structure that does not depend on a single source of risk. Our vast global supply chain directly connecting the Middle East and Africa serves as an inexhaustible cash cow, firmly supporting our foundation. The massive liquidity generated on this solid foundation flows continuously into premium M&A deals and new business infrastructure, ultimately achieving a Quantum Jump that exponentially multiplies our asset base.

The Pulse of the Fourth Industrial Revolution: A Perfect 'Technology-Capital-Market' Triangle

We are now focused on the irreplaceable blood of the Fourth Industrial Revolution. For the heart of massive future industries—AI semiconductors, humanoid robots, and superconductors—to beat, 6N (99.99999%) ultra-high-purity copper powder is an absolute necessity. Mura Korea's proprietary 6N technology, which guarantees a dominant position in the high-end materials market, UNICO ENERGY GROUP's capital strength, capable of closing deals worth hundreds of billions of won, and our three major global hubs spanning the Middle East, Africa, Europe, and Asia—these three pillars converge to complete a perfect triangular moat that no one can replicate.

An Invitation to the Most Dazzling Voyage of Capital

A path that begins at the distant origin of the resources that move the world and reaches the very pinnacle of the global capital markets. To join UNICO ENERGY GROUP is to take part in an extraordinary symphony of returns, forged by the weight of tangible assets unshaken by any headwind and the agility of financial engineering that effortlessly transcends limits. Now, having secured leadership in future-tied technology industries and established itself as a rare platform in the global supply chain, UNICO ENERGY GROUP cordially invites you to join the most dazzling and momentous journey it is embarking upon.

I. COMPANY OVERVIEW

1.1 Corporate Overview

Global raw materials industry and international oil solutions business
Global Raw Materials Industry and International Oil Solutions Business

A Challenge Beyond the Present, Toward the Future

As the global shipping industry shifts toward carbon neutrality and eco-friendly fuels, UNICO ENERGY GROUP is expanding into next-generation marine fuels supply systems. Leveraging the technological capabilities of Korea Shipbuilding & Offshore Engineering (KSOE), the intermediate holding company of HD Hyundai Group's shipbuilding division, we are actively participating in eco-friendly marine fuel supply systems such as FGSS (Fuel Gas Supply System) and LFSS (Low Flash Point Fuel Supply System). Through this, we are leading the way in providing solutions that realize the core values of the future marine industry: eco-friendliness, energy efficiency, and carbon emission reduction. As a specialized company that has grown alongside the development of the global marine industry, UNICO ENERGY GROUP carries out a wide range of vessel and marine projects based on its accumulated global network and extensive marketing capabilities. We support the export and project execution of a broad range of vessel types, including Very Large Crude Carriers (VLCC), container ships, LNG carriers, special-purpose vessels and naval ships, as well as small and mid-sized vessels such as petroleum product carriers, feeder container ships and tugboats.

In particular, based on our cooperation with leading Korean shipbuilders including HD Hyundai Heavy Industries, we continue to expand business opportunities in emerging shipbuilding markets across Asia and the CIS region. Beyond new building projects, we also participate in the supply of core engines from global engine manufacturers MAN Energy Solutions and Wärtsilä, as well as propulsion and generator engines distributed by HD Hyundai Heavy Industries, providing comprehensive solutions across the marine industry.

UNICO ENERGY GROUP connects the world and creates the value of the future

UNICO ENERGY GROUP has accumulated extensive experience and expertise in the marine and infrastructure industries over many years, yet we do not rest on our current achievements. In a rapidly changing global industrial environment, we continuously uncover new opportunities and are evolving into an integrated platform company connecting the energy, marine, raw materials and infrastructure industries. Guided by the spirit of the Samjogo (three-legged crow)—Vision, Challenge and Prosperity—we will lead future industries and achieve sustainable growth together with our customers, partners and society.

Guided by the spirit of the Samjogo—Vision, Challenge and Prosperity—we will lead future industries and achieve sustainable growth together with our customers, partners and society.

Energy trading, logistics, storage facilities, raw material distribution, and an AI-based global platform company

UNICO ENERGY GROUP participates in major infrastructure development projects around the world through its global supply chain and strategic partnerships, aiming to play a key role in elevating Korea's global standing in the international oil, energy, and infrastructure industries.

MESSAGE FROM THE CHAIRMAN

A Challenge Toward a New Era, and the Creation of Greater Value

I. COMPANY OVERVIEW

I-02. CHAIRMAN'S VISION

To our valued customers and partners who cherish UNICO ENERGY GROUP and continue to place your unwavering trust and support in us, we extend our deepest gratitude.

Today, the global economy and industrial landscape are changing faster than ever, driven by geopolitical shifts, the restructuring of global supply chains, strengthened energy security, the transition to eco-friendly industries, and digital innovation centered on artificial intelligence (AI). While these changes present new challenges, they also mark the beginning of new opportunities for companies preparing for the future. Since our founding, UNICO ENERGY GROUP has strived not to fear the currents of change, but to discover new possibilities within them and become a company that creates the value of the future. Building on the experience and expertise accumulated in oil and gas trading, we have established a global energy supply chain, and we are laying new foundations for growth by expanding into future strategic raw materials such as aluminum, electrolytic copper, and rare metals. In particular, we are building an integrated network spanning the global market by connecting the UAE's financial network, Singapore's global logistics competitiveness, and Korea's industrial capabilities. Through this, we aim to grow beyond a simple trading company into a platform company that connects the global value chain of energy and strategic raw materials and creates new value. We are also actively applying AI and data technologies across global market analysis, supply chain optimization, risk management, demand forecasting, and management decision-making, building a more sophisticated and efficient management system. For us, AI is not merely a technology or a tool for operational efficiency — it is a core driving force of innovation that creates future competitiveness and adds new possibilities to the energy and raw materials industries. Going forward, UNICO ENERGY GROUP will fuse the tangible competitiveness of the energy industry with advanced digital technology to become a global energy, raw materials, and AI platform company. The growth we pursue is not confined to simply expanding the scale of our business. We aim for value-centered growth that supports our customers' success, creates new value together with our partners, and contributes to the sustainable development of industry and society. To this end, UNICO ENERGY GROUP holds Trust, Responsibility, and Innovation as its core values. Trust is the starting point of every business; responsibility is the foundation of sustainable growth; and innovation is the most powerful driving force for turning a changing era into new opportunity and pioneering the future. Going forward, we will continue to actively respond to changes in the global market through transparent and principled management, a stable supply system, and responsible decision-making, building sustainable growth and long-term corporate value. UNICO ENERGY GROUP stands where it is today because of the unwavering trust and support of our customers and partners. Going forward, UNICO ENERGY GROUP will continue to grow as a global energy, raw materials, and AI platform company that connects the world, creates new value, and builds a sustainable future. We will grow together with our customers, build the future together with our partners, and realize greater value together with society. We humbly ask for your continued interest and support as UNICO ENERGY GROUP turns this era of change into opportunity and makes the possibilities of the future a reality. We sincerely wish health, happiness, and boundless growth and prosperity for you, your families, and your businesses.

Thank you.

UNICO ENERGY GROUP CO., LTD.

Chairman Choi Young-chang

I. COMPANY OVERVIEW

I-03 Corporate Philosophy

Management Philosophy Based on the Spirit of Harmony, Challenge, and Creation

COMPANY OVERVIEW&MANAGEMENT PHILOSOPHY

① Concord: The Power of Unity Through Harmony

This is the first spirit UNICO ENERGY GROUP has upheld for the past 40 years. UNICO ENERGY GROUP maintains a culture of harmony in which employees, customers, and partners unite in trust and grow together.

② Challenge: The Courage to Never Fear Change

This is the second spirit UNICO ENERGY GROUP has upheld for the past 40 years. UNICO ENERGY GROUP pursues continuous innovation, breaking through existing limits to pioneer new markets and business areas.

③ Creation: The Power to Create New Value

This is the third spirit UNICO ENERGY GROUP has upheld for the past 40 years. UNICO ENERGY GROUP practices a spirit of creation, finding opportunities others overlook in a changing market and generating new value.

Inhwa (人和): Harmony

Employees, customers, and partners unite in trust, building a culture of harmony where we grow together.

Dojeon (挑戰): Courage

We do not fear change; we continuously break through existing limits to pioneer new markets and business areas. UNICO ENERGY GROUP leads the future through continuous innovation.

Changjo (創造): AI-driven

We create new value together with customers, partners, and society. Through continuous creative innovation, we build a sustainable future.

Vision

Guided by our vision, "Future in Business Solution," we are fully committed to creating customer value and enhancing business excellence to leap forward as an advanced enterprise.

I. Company Overview

1-03 Corporate Philosophy

We integrate international trade operations, financial services, and overseas resource markets into a single synergy, providing advanced industrial infrastructure solutions.

Based on 30 years of know-how in building and operating systems across our distribution sectors (crude oil, aluminum, copper (copper powder), non-ferrous metals, machinery, etc.) and the energy resources sector, combined with cutting-edge IT capabilities drawn from accumulated financial expertise and systematic marketing, customer management, and information management experience in the service and leisure industry, we focus on delivering advanced solutions that drive management innovation, performance, and greater value across every industry we serve.

The World's Leading Company for Innovation and Technology

www.unicoenergygroup.com

Core Values & Strengths

CORE VALUES & STRENGTHS

Through the spirit of Harmony, Challenge, and Creation, we connect the world and create the value of the future.

Energy/Resources Trading

UNICO ENERGY GROUP provides state-of-the-art global supply chain solutions that combine AI-based digital technology with the traditional resource trading industry, built on our know-how in establishing and operating systems spanning procurement, storage, transport, and supply across the entire energy and raw materials trading business—crude oil, gas and non-ferrous metals (aluminum, electrolytic copper). Beyond trading, finance and accounting, logistics and quality management, we implement an integrated trading system that connects a range of advanced value-added solutions, including Asset Securitization, CB Matching, ISE international certification linkage, AI Market Intelligence for real-time market analysis, and Digital Twin-based supply chain control. Through seamless interfaces with global partners and the application of AI/IoT sensors, we innovate our customers' raw material procurement methods and supply chain management systems.

International Finance

The energy and raw materials trading industry is a field that requires the fastest structural innovation, built on tangible assets and financial engineering. The diverse know-how accumulated in the field of trading, combined with advanced financial structuring technology, further enhances future-oriented business competitiveness—including a rapid shift toward digital asset securitization and improved supply chain operations. We have successfully fulfilled raw material supply contracts with leading domestic processing-listed companies such as Daehyo AL, Samah Aluminum, and Seoul Non-Ferrous Metals, and our 6N ultra-high-purity copper powder solution, secured through our partnership with Murua Korea, combined with Swiss ISE international certification, enables a rapid transition to a cash-outflow-free structure through CB matching and asset swaps. We have continued to expand our business in line with changing trends in the energy and raw materials markets, including establishing a direct crude oil import line from Kazakhstan and Russia, developing the Hadong Galsaman LPG terminal, and securing the Zambia-DRC non-ferrous metal resource belt.

AI-Based Services

We provide customer-tailored, specialized supply solutions to lead the eco-friendly mobility and storage/logistics infrastructure industries emerging as future growth sectors. Through experience gained from market analysis, supply chain management, risk management, and other critical functions in the storage and logistics infrastructure industry—we enhance competitiveness in the eco-friendly mobility and infrastructure industries by offering diverse solutions based on our AI-driven data platform experience (market analysis, hedging strategy, logistics control). We enable efficient and productive supply operations by integrating and standardizing all storage and logistics processes at the Pyeongtaek and Ulsan port terminals. We also provide systems and software specialized in raw material distribution by applying advanced AI/IoT-based control solutions.

I-04. Company History

The company's way out

UNICO ENERGY GROUP HISTORY

● 2021~

LPG Business Planning and Feasibility Review Initiated

UNICO ENERGY GROUP is making significant investments in R&D to advance cutting-edge technologies that improve efficiency and safety across all business operations.

● 2022~

Gas Distribution Business Registration and Acquisition of Hadong Petroleum Terminal Site

UNICO ENERGY GROUP is at the forefront of developing sustainable methods that meet global energy demand while minimizing environmental impact.

● 2024~

UNICO ENERGY GROUP Name Change and Corporate Incorporation

UNICO ENERGY GROUP's unwavering commitment to safety and operational excellence is reflected in our strict standards and practices.

● 2026~

LPG Storage Facility Completion and Full Scale Operations Planned

UNICO ENERGY GROUP believes that leading collaboration and innovation is a powerful force in achieving shared goals.

● 2027~

Achieving Status as a Northeast Asian Energy Integration Platform Hub

UNICO ENERGY GROUP's team of experts and leaders is recognized for its deep industry knowledge and thought leadership. Our extensive global network and market presence allow us to adapt to the evolving dynamics of future industries and seize new opportunities.

UNICO ENERGY GROUP, a global company that has continued its legacy of customer satisfaction, completes a new standard of value for life.

In a short period of time, UNICO ENERGY GROUP has broken through the entrenched oligopoly structure of the global market and established unparalleled milestones in the energy and raw materials markets. UNICO ENERGY GROUP's leadership is composed of masters with decades of proven expertise across capital markets, global trading, energy engineering, and external affairs. In response to the restructuring of the global aluminum supply chain, we secured the largest smelters in the Middle East (ALBA, EGA) and supply sources in Africa. We signed large-scale raw material trading contracts and assumed supply succession with leading domestic processing-listed companies (such as Daeho AL). Future Innovation Leap Phase: Fusion of Advanced New Materials and Sophisticated Financial Structuring — securing an exclusive supply chain for Swiss ISE internationally certified 6N ultra-high-purity copper powder (METIS Project launched). Establishing an innovative, cash-outflow-free financial business model combining tangible assets with financial assets (Asset Swap, CB Matching). Signing a large-scale, long-term supply contract for premium Copper Cathode Grade A originating from Zambia and the DRC. Securing status as a core new-material technology partner for the AI semiconductor and humanoid robot ecosystem.

1.5 Organization & Leadership — Perfect Synergy Created by World-Class Experts

Continuing 30 Years of Trust with Overseas Buyers,

UNICO ENERGY GROUP, a Global Company, Completes a New Standard of Value for Life

- Integrated Information System
- Supply Chain Management
- Product Lifecycle Management
- Process Innovation & IT Strategic Planning
- Next-Generation AI System
- International Financial System
- Mobile & Cyber Marketing
- Comprehensive Financial Planning System

W1NE (World No.1 Next gGeneration) is our in-house developed next-generation integrated business solution brand.

1-05 Executive Management

CURRENT PROFILE

Chairman

Brian Choi

As the founder and Chairman of UNICO ENERGY, he oversees the company's overall strategic planning, new business development, and sustainability initiatives. He has built a diverse business career spanning over 30 years in global energy trading and international raw materials markets, specializing in intermediary trade, and studied Law and International Business at both the undergraduate and graduate levels at Dongguk University.

President

Yoon Seung-young

He majored in IT at the University of Technology Sydney (UTS) in Australia, where he earned his master's degree. With a background as an IT engineering specialist in the energy industry, he currently serves as President.

Managing Director

Henry Cho

A computer-aided design specialist engineer who graduated from the Department of Chemical Engineering at the University of Illinois and earned his master's and doctoral degrees in chemical engineering from Washington State University, and later served as Senior Technical Advisor at Aramco and GS Caltex.

Executive Director

John Lee

He has over 10 years of recent experience in oil trading, along with 30 years of business experience in steel, power plants, and project development. He holds a Master's degree in Electrical Engineering from Chung-Ang University in Korea.

Senior Advisor

Shinbum Lee

He previously served as a member of the National Assembly of the Republic of Korea and as Chairman of the Korea LPG Industry Association. He holds a Master of Laws degree from Seoul National University.

**For the Greatest Leap Forward,
We Have Prepared Our Organization and Systems**

All of our employees will continue to prioritize customer needs, further strengthen competitiveness in both domestic and international markets, and continue to advance through ongoing quality innovation and technology development.

Unrivaed Technology and
an Exclusive Global Supply Chain
Exclusive Supply of 6N (99.9999%) Grade Ultra-
High-Purity Copper Powder

1-06. Introduction of Advisory Board

EXECUTIVES AND STAFF

Our Team

Core Partnership: UNICO ENERGY GROUP & Murua Korea

Through an exclusive partnership with Murua Korea Corp., UNICO ENERGY GROUP aims to secure a leading position in the market for 6N (99.9999%) ultra-high-purity copper powder, a core material for cutting-edge global industries. This 'METIS Project' aims to build supply chains for strategic industries — such as AI semiconductors, aerospace, and humanoid robotics — that must overcome physical limitations, while maximizing capital efficiency through advanced financial structuring based on tangible assets.

The world is currently facing the limits of existing materials amid the rapid expansion of AI models. 6N copper powder is not merely a raw material — it is a 'strategic asset' that determines the yield of advanced technologies. Growth Drivers: HBM 4/5/6 generation semiconductors, humanoid robots such as Tesla Optimus, LEO satellites, and next-generation defense systems.

Supply Shortage: Current global distribution capacity falls significantly short of projected 2030 demand (1,000+ MT), making secured supply lines a source of tremendous market competitiveness in their own right.

Pak Zhe Khi

An expert who has led global business development and marketing in the Russia/CIS market for over 30 years. Having worked at Cheil Worldwide, Samsung Electronics Russia, and SP Global, he currently serves as CEO of Murua Korea, leading international business and strategic partnerships.

Yoo Hyun-geun

He worked in finance and corporate finance at Shinhan Bank for over 21 years and graduated from the Department of Economics at Korea University. He currently serves as a Director at Samduk Accounting Corporation, bringing extensive expertise and practical experience in finance.

Im Chun-hak

He is a professor at Korea University College of Medicine and a leading authority in the field of anesthesiology and pain medicine. He has served as a policy director of the Korean Academy of Medical Sciences and other major academic societies, bringing extensive expertise and leadership in education, research, and healthcare policy.

Perfect Synergy Created by World-Class Experts — UNICO ENERGY GROUP's leadership is composed of experts with decades of proven expertise across capital markets, global trading, energy engineering, and external affairs.

Breaking down market barriers with a bold
direct network to realize the perfect portfolio

2-1. Global Network (Global Network)

Breaking the Oligopoly & Sustainable Portfolio

Breaking down market barriers with a bold direct network to realize the perfect portfolio

1

Breaking the Oligopoly

Directly dismantling the market barriers long monopolized by a handful of global giants.

2

Sustainable Portfolio

A portfolio built on traditional energy as a liquidity base, with copper powder and aluminum as growth drivers

3

Strategic Implications

The combination of an oligopoly-breaking strategy and new-material growth drivers completes a long-term competitive advantage

MAIN PRODUCTS

- **MONOMER**
Benzene, Toluene, Mixed Xylene
MEG, DEG, C-4, C-5, etc.
- **POLYMER**
Polyethylene, Polypropylene, DOP, ABS,
Polyvinyl chloride, Phthalic Anhydride, etc.
- **INORGANIC CHEMISTRY**
NPK, Urea, DAP, Amsoil
Sulfuric acid, Sulfur, etc.
- **PETROLEUM COKES**
High/Low sulphur from USGC (USWC),
Philippines, Middle East, Argentina, Indonesia, etc.

Portfolio Composition

■ Traditional energy (liquidity) ■ Powdered copper (growth engine) ■ Aluminum (growth engine)

Petrochemicals & Energy

We supply major global companies with petrochemical products such as monomers and polymers, inorganic chemical products like fertilizers, and various fuels including petroleum coke (petcoke).

Driving Explosive Cash Liquidity Through Listed Company Partnerships

We connect the value of these massive tangible assets with capital markets to create dramatic synergies. Based on ultra-high-value tangible assets in the form of ultra-high-purity copper powder, we meticulously design convertible bond (CB) matching and asset swap structures to attract strategic investment from numerous listed companies within the regulated market. Through this, UNICO ENERGY GROUP simultaneously secures an innovative financial structure of 'zero cash outflow' for the company and immediate market liquidity. The copper powder business jointly led by UNICO ENERGY GROUP and Murua Korea will become a powerful weapon in the era of resource weaponization, and a model for asset securitization that will transform the paradigm of capital markets.

2-1. Global Network

Advanced Material Securitization

An advanced global hub network connecting the world's major energy resource nations with demand centers for cutting-edge new materials in real time

1

UAE — Saudi Energy Line

Operating a direct-import energy line connecting the Middle East's largest oil-producing nations with logistics and financial hubs

Supplying the energy that powers our era with the utmost precision and stability

Energy is the foundation that sustains human civilization, and the deepest, most solid cornerstone upon which UNICO ENERGY GROUP has rooted itself in the global market. Even amid macroeconomic fluctuations and geopolitical crises, our energy trading powers the veins of the world without the slightest wavering.

2

Zambia — DRC Non-Ferrous Metal Belt

Directly targeting the Central African Copper Belt, the world's largest deposit region for copper and cobalt

Commanding the Supply Chain Through Direct Sourcing: We have removed the unnecessary layers of intermediary distribution. Built on solid trust with global major refiners and national oil companies spanning the Middle East, Russia, and Asia, we operate direct import lines for core energy sources — from crude oil to refined products and natural gas — under the most competitive terms.

3

Exclusive Supply Rights Strategy

Eliminating intermediary distribution margins through long-term direct contracts with national resource companies and local smelters

Turning Risk into Opportunity Through Hedging: The volatility of rapidly shifting international oil prices and exchange rates is not a threat to us, but an opportunity to gain strategic advantage. By analyzing global market data in real time and combining advanced derivatives and forward contracts into a risk-hedging system, we offer our partners the most predictable and stable pricing structure.

Organic Integration of Three Global Hubs

Asia Hub (Seoul)

Global platform control · Financial structuring design ·
Pyeongtaek/Ulsan terminal control

Global platform control · Financial structuring design · Pyeongtaek and
Ulsan terminal control

European Finance & Certification Network (Switzerland)

A financial bridge backed by the world's most authoritative international certification

1

ISE International Certification

Verified for quality and value by Swiss international certification

We have secured an exclusive supply chain for 6N (99.9999%) grade ultra-high-purity copper powder, certified under the rigorous and demanding international standards of the Swiss ISE (International Services Evaluation). This extraordinary purity material is an irreplaceable core substance for realizing precision components in AI semiconductors, superconductor technology, next-generation aerospace, and humanoid robotics.

2

Securing Tangible Assets

We have meticulously designed convertible bond (CB) matching and asset swap structures based on the ultra-high-value tangible asset of ultra-high-purity copper powder. Through this, UNICO ENERGY GROUP achieves an innovative financial structure of 'zero cash outflow' for the company, while securing immense liquidity that can be immediately converted to cash in the market — completing a virtuous cycle of exponential value creation.

3

Capital Markets Linkage

UNICO ENERGY GROUP has established a strategic joint business structure with Murua Korea to perfectly combine technology and market access. The advanced technical infrastructure and network held by Murua Korea, combined with UNICO ENERGY GROUP's overwhelming global trading capital strength, has built a powerful barrier to entry in the global new materials market and secured an exclusive market position.

The Role of Swiss ISE

ISE is an internationally recognized certification body that evaluates the purity, quality, and value of tangible new-material assets against near-extreme standards. New materials handled by our company, such as 6N ultra-high-purity copper powder, acquire internationally recognized standard value by passing ISE certification. [Swiss ISE International Certification] → [UNICO/Murua Korea Joint Venture] → [Listed Company Investment Attraction & CB Matching] → [Realization of Ultra-Large-Scale Asset Securitization]

Europe (Switzerland)

Coordination with international certification bodies (ISE) ·
Standardization of tangible assets · Capital markets linkage

Collaboration with International Certification Organizations (ISEs),
standardization of real assets, and linkage with capital markets

2-1.Global Network

Middle East & Africa Network (GLOBAL NETWORK — MIDDLE EAST & AFRICA)

UNICO ENERGY GROUP operates an advanced global hub network connecting the world's major energy resource nations with demand centers for cutting-edge new materials in real time. We go beyond simple regional expansion, organically combining the geopolitical characteristics and financial infrastructure of each region to complete a 'global integrated trade and energy platform' unlike any that has existed before. [Europe/Switzerland Hub] — [Middle East/Africa Hub] — [Asia/Korea Headquarters] (International Certification & Asset Securitization) (Raw Material & Energy Procurement) (Platform Control & Liquidity)

Asia Hub (Headquarters, Seoul, Korea): The control tower that oversees the global platform and designs financial structuring.

It closely controls large-scale tank terminals and logistics stockpile infrastructure centered on Pyeongtaek and Ulsan ports, coordinating the supply chain across Asia.

Middle East & Africa Network: Directly controlling an energy line connecting the UAE and Saudi Arabia, as well as a premium non-ferrous metal resource belt spanning Zambia and the Democratic Republic of Congo (DRC), securing exclusive supply rights. European Finance & Certification Network (Switzerland): Working in close coordination with ISE, the world's most authoritative international certification body, we standardize the value of tangible assets and serve as a financial bridge linking to global capital markets.

2-2Energy & Raw Materials Business Strategy

The Beginning of a Great Narrative — Where Tangible Assets Meet Financial Innovation

Investment is not merely the movement of capital. It is the insight to see through to the value of a future yet to come, and an unwavering belief in joining a great narrative that changes the world. UNICO ENERGY GROUP stands at the very pinnacle where the unshakable weight of tangible assets meets the sharp innovation of financial engineering. On the solid ground of energy and core infrastructure materials — whose fundamental value never disappears, even amid economic crises — we are building an innovative financial skyscraper unlike any the world has seen.

1

Traditional Trading Model
Purchase resources for simple distribution · Cash paid upfront · Repeated margin-driven transactions

Our assets carry permanence in and of themselves. The ultra-high-purity copper powder assets secured through our partnership with Murua Korea are far more than a simple raw material — they are the starting point of a magic that creates explosive liquidity. Having had their objective value verified in global capital markets through rigorous Swiss ISE international certification, these tangible assets blossom into a sophisticated 'financial alchemy' that enables CB matching and asset swaps without any cash outflow. This unrivaled DNA — transforming resources into assets and converting them into massive liquidity — promises investors an absolute downside resilience (stability) that remains unshaken by any crisis.

2

UNICO's Convergence Model
Combining Physical Assets with Financial Structuring

UNICO ENERGY GROUP's journey is built on a sophisticated three-tier, multi-layer structure that does not depend on a single source of risk. Our vast global supply chain directly connecting the Middle East and Africa serves as an inexhaustible cash cow, firmly supporting our foundation. The massive liquidity generated on this solid foundation flows continuously into premium M&A deals and new business infrastructure, ultimately achieving a Quantum Jump that exponentially multiplies our asset base.

3

Innovation in Zero Cash-Outflow Structure
Utilizing advanced financial techniques such as Asset Swaps and CB Matching

We are now focused on the 'irreplaceable blood' of the Fourth Industrial Revolution. For the heart of massive future industries — AI semiconductors, humanoid robots, and superconductors — to beat, 6N (99.9999%) ultra-high-purity copper powder is an absolute necessity. Murua Korea's proprietary 6N technology, which guarantees a dominant position in the high-end materials market; UNICO ENERGY GROUP's capital strength, capable of closing deals worth hundreds of billions of won; and our three major global hubs spanning the Middle East, Africa, Europe, and Asia — these three pillars converge to complete a perfect triangular moat that no one can replicate.

2-2. Global Supply Chain System

GLOBAL SUPPLY CHAIN

A Paradigm Shift — The Great Convergence of Tangible Assets and Financial Structuring

Digital Assets · Global Finance

(Digital Asset & Global Finance)

A New Frontier Connecting Tangible Assets with Global Capital

Building on the global network accumulated through our energy, raw materials, and infrastructure businesses, UNICO ENERGY GROUP is strategically reviewing and expanding into institutional-focused digital asset OTC trading and Real-World Asset (RWA) securitization. Through connections with financial hubs in the Middle East and Asia, our mid-to-long-term direction is to build a global settlement and financing platform that bridges tangible assets with digital capital markets.

Core Initiative Areas

01

Institutional OTC

Institutional-grade digital asset OTC network under strategic review

02

RWA Financing

Structuring real-world asset tokenization for global capital access

03

Global Settlement

Expanding global settlement infrastructure across Asia and the Middle East

Position Within Global Supply Chain

2-2 Energy & Raw Materials Business Strategy

ENERGY & RESOURCES STRATEGY

(01). Distribution Hub Structure.1 (Energy resource supply and distribution hub structure)

Distribution Hub Structure.2 Perfect Intelligent Supply Allows Not a Single Second of Pause

02). UNICO ENERGY GROUP's Energy Resource Supply & Distribution Hub Structure

We control the entire process — from resource discovery to refining, logistics, and final delivery — through rigorous compliance and a digital control infrastructure system. By boldly eliminating intermediary distribution stages and sourcing raw materials exclusively through direct contracts (Direct Line) with refiners and major smelters, we maintain overwhelming cost-effectiveness and supply stability.

1

Resource Discovery → Refining → Logistics → Final Delivery
The Entire Process Controlled by Rigorous Compliance + Digital Control Infrastructure

2

Zero-Risk Management

A multi-dimensional risk hedging system that proactively defends against geopolitical shifts, currency fluctuations, and logistics disruptions

3

Direct-Import Belt

Maintaining overwhelming cost-effectiveness and supply stability through direct contracts with refiners and major smelters

2-2 Energy & Raw Materials Business Strategy

Payment & Inspection Process

A Great Era of Transformation Where All Boundaries Are Dissolving

From components that help lighten vehicles, to materials that boost battery efficiency, to exterior materials that enhance the durability and design of home appliances, to the hygiene and heat conductivity of kitchenware — UNICO ENERGY GROUP adds value to everyday life in ways that often go unseen. Materials that make today more convenient and tomorrow more sustainable — that is UNICO ENERGY GROUP's aluminum.

UNICO ENERGY GROUP's technology is embedded in the cars we drive, the appliances we use, and the items we encounter daily in the kitchen. UNICO ENERGY GROUP distributes aluminum coils, transition plates, and sheet materials, supplying core materials to a wide range of industries including large-scale apartment interior fittings, remodeling, and kitchenware. We have become a solid foundation that enhances function and quality throughout everyday life.

Cutting-Edge Technology · Rigorous Risk Management · Compliance with Sustainability Standards

The oil and gas industry forms the foundation of modern energy supply, supporting transportation, power generation, and industrial production worldwide.

The oil and gas industry forms the foundation of modern energy supply, supporting transportation, electricity generation, and industrial production worldwide.

ENERGY

ECO-FRIENDLY

UNICO ENERGY GROUP builds a "global trading ecosystem" spanning crude oil, gas, and non-ferrous metals (aluminum) to resolve the energy supply-demand imbalance in the Asian market. UNICO ENERGY GROUP pursues excellence in Health, Safety, and Environment (HSE) for its employees, which forms the foundation of our operations and a core part of our corporate value. We place the highest priority on the welfare of our employees, local communities, and the environment through strict standards and proactive measures. The following is how we put our commitment to HSE into practice.

Through the merger of UNICO ENERGY GROUP and Pagsanjan Co., Ltd., we have completed the construction and operation roadmap for the Gyeongnam-Hadong Goksan LPG Terminal, as well as every stage of the LNG value chain.

We will continue to expand our business by demonstrating expertise across all areas of energy, including LNG, and will grow into a business that enhances sustainability by advancing eco-friendly energy technologies.

Global Energy Business Status

- 9. Petrochemical Refining & Chemicals
- 10. Petrochemical Refining & Chemicals

Shin-Sa Power, Jeonnam Onshore Offshore Wind Power, Tanshen Sewage Heat Project

Energy Value Chain

UNICO ENERGY GROUP's energy value chain is divided into three stages: upstream, midstream, and downstream. The upstream stage focuses on crude oil and natural gas, the midstream stage on refining and petrochemicals, and the downstream stage on petrochemical products and services.

UNICO-UNICO ENERGY GROUP BROCHURE

Non-Ferrous Metals

Based on our global trading capabilities and overseas network, we stably supply steel products, raw materials, and battery materials, leading the completion of UNICO ENERGY GROUP's eco-friendly future materials value chain. Furthermore, in response to the robust growth of the eco-friendly vehicle industry, we are cultivating a mobility components business centered on drive motor cores, evolving into a total steel solutions provider.

Steel Value Chain

Based on our steel procurement capabilities, we stably supply eco-friendly steel grades to domestic and international demand industries, and are strengthening our future growth by expanding into battery materials and online steel sales platforms.

In step with the changing pace of the world, steel too is rising down the path toward sustainability. We offer new solutions whenever steel is needed, at home and abroad, leading global steel business success in the steel value chain.

2-3. Global Supply Chain System

GLOBAL SUPPLY CHAIN

The domestic aluminum distribution network secures raw materials from overseas smelters and global traders, which then flow through major importers/distributors and specialized processing/sales companies to key demand industries such as automotive, construction, shipbuilding, and electrical/electronics. Recently, securing a stable overseas procurement network and a nationwide logistics/sales network has emerged as a core competitive advantage in responding to price volatility and supply chain risk.

THE PERFECT PLATFORM

From the point where all of the world's deficiencies are resolved, we go beyond the simple movement of resources to create a new century for global industry.

32. Aluminum & Non-Ferrous Metals

ALUMINUM & NON-FERROUS METALS

1

UNICO ENERGY GROUP → Daeho AL

Supply succession and volume secured — contracted delivery of 1,000 MT completed
Building the Backbone of Industry and Completing the Blueprint for Future Infrastructure
From construction and shipbuilding to electric vehicles (EVs) and future mobility, the value of high-quality non-ferrous metals continues to soar as the global industrial paradigm advances. We have secured powerful supply dominance in the non-ferrous metals market through strategic alliances with major global smelters.

2

Samah Aluminum · Seoul Non-Ferrous Metals

Listed companies specializing in automotive and construction materials, partners in ongoing collaboration
A Mega Supplier of A7 Aluminum Ingots: In an era where lightweighting itself is technological capability, we have secured a stable supply of high-purity aluminum ingots (A7) through large-scale, long-term contracts with the Middle East's top-tier smelters (such as ALBA and EGA) and core African suppliers. Through this, we have established ourselves as a core partner to leading domestic processing-listed companies and major manufacturing vendors.

3

Settlement & Inspection System

CIF Busan/Incheon Port · 100% T/T Settlement · SGS-Certified Quality Inspection · SBLC MT760 Guarantee

Flexible Volume Control Based on a Global Network: Beyond simple import and sales, we deliver volume at the optimal timing by precisely analyzing real-time price trends on the London Metal Exchange (LME) and spot market premiums. This is our differentiated capability that maximizes the manufacturing cost competitiveness of end-user companies.

(2). Aluminum Smelting & Raw Material Production

(Primary Production — Bauxite to Pure Aluminum Ingot)

raw materials Bauxite → Aluminum oxide (Alumina) → Aluminum metal (Al) 	Major producing countries China 55% / India 6% Russia 5% (Under Sanctions) UAE-Bahrain South Africa 
ALBA Bahrain One of the world's top 10 smelters, annual production of 1.3 million tons, low-carbon, eco-friendly production 	2025 production Global 76.5M MT, China's Structural Cap, Supply Tight Continues 

Precision in every ingot, strength in every alliance

UNICO ENERGY GROUP's aluminum and non-ferrous metals business is built on more than volume — it is built on trust. Through direct-import lines with the world's top-tier smelters and long-term partnerships with listed processors, we deliver the consistency that construction, mobility, and advanced manufacturing depend on.

This is our differentiated capability that maximizes price competitiveness.

We have established ourselves as a core partner to leading domestic processing-listed companies and major manufacturing vendors.

Products & Services

1. Executive Summary

Transcending the Limits of Resources to Write a New Chapter in Capital Markets

Through an exclusive partnership with Murua Korea Corp., UNICO ENERGY GROUP aims to secure a leading position in the market for 6N (99.9999%) ultra-high-purity copper powder, a core material for cutting-edge global industries.

2. Market Opportunity

The world is currently facing the limits of existing materials amid the rapid expansion of AI models. 6N copper powder is not merely a raw material — it is a 'strategic asset' that determines the yield of advanced technologies.
Growth Drivers: HBM 4/5/6 generation semiconductors, humanoid robots such as Tesla Optimus, LEO satellites, and next-generation defense systems.
Supply Shortage: Current global production capacity falls significantly short of projected 2030 demand (1,000+ MT), making secured supply lines a source of tremendous market competitiveness in their own right.

Transcending the Limits of Resources to Write a New Chapter in Capital Markets

We have completed an 'insurmountable supply chain' that no one else can approach.

3.3 Copper & Advanced Materials

Electrolytic Copper / Copper Powder (Electrolytic copper/powdered copper)

Through an exclusive partnership with Murua Korea Corp., UNICO ENERGY GROUP aims to secure a leading position in the market for 6N (99.9999%) ultra-high-purity copper powder, a core material for cutting-edge global industries. This 'METIS Project' aims to build supply chains for strategic industries — such as AI semiconductors, aerospace, and humanoid robotics — that must overcome physical limitations, while maximizing capital efficiency through advanced financial structuring based on tangible assets.

UNICO ENERGY GROUP
COPPER POWDER

Electronics

Used to produce conductive coatings and essential components for advanced electrical devices.

Metallurgy

Added to alloys to improve mechanical strength, thermal conductivity, and corrosion resistance.

Medical Applications

Used in the production of antimicrobial coatings for medical implants and specialized devices.

3D Printing

Used to manufacture complex metal parts through a layer-by-layer deposition process.

Automotive Industry

Applied to brake pads and bearings to improve durability and wear resistance.

Rocket Engineering

Used in high-performance heat exchangers and components that must withstand significant loads.

Construction

Applied to corrosion-resistant coatings and heat exchangers to extend the life of structural elements.

Jewelry Industry

Used to make durable alloys and wear-resistant decorative components.

Aerospace Industry

Essential for components requiring high thermal conductivity and resistance to extreme conditions.

Energy Sector

Integrated into components to improve electrical conductivity and thermal efficiency of systems.

COPPER&ADVANCED MATERIALS

Creating Explosive Liquidity: Through this sophisticated strategy, we realize an 'ultra-large-scale cash liquidation' worth hundreds of billions of won, immediately usable in the market — all without deploying massive capital (zero cash outflow).

3.3 Copper & Advanced Materials

COPPER & ADVANCED MATERIALS

Copper Powder Scope of Application

SCOPE OF APPLICATION

COPPER POWDER

Copper powder is being used as a key material in various industrial fields based on its excellent electrical and thermal conductivity, as well as outstanding corrosion resistance. Based on these properties, it is widely used in electronic components, metal coatings, filter production, and even in the fields of 3D printing and precision metallurgy. The high quality and uniform properties of copper powder guarantee reliable and consistent results throughout the entire manufacturing process. The material's superior purity and homogeneity prove its value as an optimal choice that is irreplaceable in any industrial setting.

Technical Specifications TECHNICAL SPECIFICATIONS

High-purity Copper Powder (SN)
Oxygen-free Copper Ultrafine Powder Grades (PMV-E, PMV-X)
Copper Mass Fraction: 99.9999% Naturally free of radioactive isotopes
Copper Isotope Composition: Cu63 - 69.09% / Cu65 - 30.91%

High Electrical and Thermal Conductivity

Copper powder efficiently conducts heat and electricity, improving the quality and reliability of final products.

High Dispersibility and Specific Density

The fine powder structure ensures uniform distribution and contributes to high density in alloy compositions.

Antibacterial Properties for Enhanced Hygiene

It effectively inhibits bacterial growth, making the powder highly suitable for use in medical and sanitary technologies.

Business Activity
TRADING &

Marine and Infrastructure

UNICO ENERGY GROUP's supply chain connects the entire world as one.

Erasing the end and aligning values is a hub for the global market

3-4. Marine & Logistics *Infrastructure*

MARINE & LOGISTICS INFRASTRUCTURE

UNICO ENERGY GROUP → Marine & Infrastructure Status

Based on our global network, UNICO ENERGY GROUP will make a significant contribution to establishing Korea as a global leader in the marine and infrastructure industries by supplying thousands of vessels and participating in hundreds of infrastructure projects worldwide.

UNICO ENERGY GROUP actively participates in the Economic Development Cooperation Fund (EDCF) program supported by the Export-Import Bank of Korea (K-EXIM), a Korean government agency. K-EXIM offers various types of loan programs to meet the diverse needs of developing countries, and UNICO ENERGY GROUP provides detailed support throughout the entire process — from Project Concept Paper (PCP) development and feasibility studies to loan agreement execution, consultant bidding, main bidding, and final contract implementation.

UNICO ENERGY GROUP collaborates with leading Korean companies in construction/engineering equipment, government agencies and IT systems, participating in every stage of EDCF projects including marketing project, planning design and manufacturing operations and maintenance, construction supply, and installation.

Key Projects

Roads and Bridges

Digital Land Management Systems

Eco-Friendly Vessels

Education Centers

Medical Centers

Leveraging our accumulated marketing know-how and global sales network, UNICO ENERGY GROUP promotes domestic exports of mega-ton vessels such as tankers, container ships, LNG carriers, naval vessels, and special-purpose ships, as well as small and mid-sized vessels including petroleum product carriers, feeder container ships, and tugboats — positioning ourselves at the forefront of the marine industry.

We continue to expand our business in developing shipbuilding nations across Asia and the CIS region, in partnership with leading Korean shipbuilders including Hyundai Heavy Industries.

We participate not only in shipbuilding for new builds but also in the trading of licensed marine engines from global companies such as MAN and Wärtsilä, as well as propulsion and generator engines supplied by HD Hyundai Heavy Industries to major Asian shipyards, as well.

As the era of zero carbon emissions arrives, UNICO ENERGY GROUP is entering the fields of FGSS (Fuel Gas Supply System) and LFSS (Low Flash Point Fuel Supply System), produced by Korea Shipbuilding & Offshore Engineering, the intermediate holding company of HD Hyundai Group, in to these fields.

Despite having a long history in the marine and infrastructure sectors, UNICO ENERGY GROUP is not content with the status quo and continuously seeks new opportunities to go further.

Key Projects (Current Status of Marine and Infrastructure)

Container Ships and LNG Carriers

HiMSEN Propulsion and Generator Engines — Manufactured by KS Industries

Shipyard Equipment

3-4. Marine & Logistics Infrastructure

MARINE & LOGISTICS INFRASTRUCTURE

A Flawless Artery That Crosses Oceans and Connects Continents

Current Status of Marine and Infrastructu

- 1 Building a Shipping Infrastructure Network**
Signing long-term charter contracts with specialized shipping companies to achieve dramatic reductions in logistics costs
- 2 Global Strait & Route Risk Monitoring**
Predicting uncontrollable variables through an AI-based logistics control system
- 3 A Flawless Delivery Process (Zero-Delay)**
Perfect delivery management that allows not a single second of delay

A Fortress That Commands Market Flow and Concentrates Value

No matter how great an asset or energy source may be, it loses its value if it cannot reach where it is needed in time. To transport large volumes of crude oil, gas, and bulk raw materials worldwide, we optimize maritime shipping routes and partner with sign long-term charter agreements to achieve dramatic reductions in logistics costs.

Storage & Terminal Business

- 1 Pyeongtaek Port · Ulsan Port Terminals**
A Gateway to Asian Trade — Large-Scale Storage Infrastructure for Liquid Cargo and Raw Materials
- 2 Strategic Stockpiling and Market Dominance**
Serving as a 'market-regulating valve' that absorbs volume when international oil and raw material prices fluctuate
- 3 Customer-Tailored Vendor-Managed Inventory (VMI) Solutions**
Reducing inventory burden for demand-side companies and creating long-term lock-in effects

A Strategic Asset That Converts the Value of Time into Cash Value

Massive tank terminal infrastructure is far more than simple storage. It serves as a powerful 'market-regulating valve' — absorbing volume when international oil and raw material prices fluctuate, and supplying liquidity to the market during demand surges.

Marine and Infrastructure

UNICO ENERGY GROUP's supply chain connects the entire world as one.

Erasing the end and aligning values is a hub for the global market

IV. CORE COMPETITIVENESS

Key Competitiveness

4-1. Three Hub Strategy

4-2 Global Supply Chain Competitiveness

4-3 Quality Management System

4-4 AI/Digital Supply Chain

4-5 ESG Sustainable Management

True competitiveness is not a number on a financial statement — it is a 'vital force' that never stops, even in the face of crisis, and an 'absolute promise' that turns a partner's anxiety into peace of mind. Five great points of differentiation that anyone can imitate, but no one can ever reach.

This material is a presentation for investment attraction purposes. Detailed contract terms and figures are based on actual contracts and disclosure materials.

Three Hearts, Connecting the World

Not a dot on a map, but a living global organism — three great hearts
beating as one living being

4-1. Three Hub Strategy

THREE HUB STRATEGY

A Direct-Import Belt Structure

The ensemble created by these three hearts protects the business of customers worldwide without a single second of interruption. The unique mission of each hub converges into one, conducting the completed symphony of a global platform.

- 1 Middle East & Africa (The Heart of Resources)**
Securing the Primal Wellsprings of Oil, Gas, and Non-Ferrous Metals
- 2 Asia Headquarters (The Heart of Control & Innovation)**
The Control Tower for Asset Securitization and Investment Matching
- 3 Europe (The Heart of Trust & Value)**
Standardizing Asset Value Through ISE International Certification

Perfect Ensemble

A company's true competitiveness is not proven merely by numbers on a financial statement or the size of assets in a warehouse. It is a 'Vitality' that keeps beating even in the face of unpredictable, massive crises, and an 'absolute promise' that transforms a partner's anxiety into peace of mind.

UNICO ENERGY GROUP CO., LTD. infuses technology, sensibility, and trust into the veins of global trade, establishing a new standard for a 'global integrated trade and energy platform' unlike any that has existed before. We present five great points of differentiation unique to UNICO ENERGY GROUP — points that anyone can imitate, but no one can ever reach.

UNICO ENERGY GROUP's global network is not simply a physical expansion of offices around the world. Three great hearts — Asia, the Middle East/Africa, and Europe — beat organically as one living organism, commanding the flow of global capital and resources.

Middle East & Africa (The Heart of Resources): This is where primal energy, blessed by the scorching sun and the earth, springs forth.

Here, we are the first to mine and secure oil, gas, and the premium non-ferrous metals held within the red earth of Zambia and the DRC, securing a massive wellspring for our global supply chain.

Europe (The Heart of Trust and Value): Our European hub, centered in Switzerland, is where we bestow the name of 'perfection' upon the tangible assets we have unearthed. Through the world's most authoritative international certification (ISE), we standardize the value of our assets and combine this with global financial infrastructure to convert intangible trust into the most certain of financial assets.

Asia Headquarters (The Heart of Control and Innovation): The control tower at the Seoul Trade Center in Korea is the brain and heart that fuses all of these flows together. It reads real-time shifts in demand across the Asian market, orchestrates the miracle of asset securitization and investment matching, and conducts the completed symphony of the global platform.

The ensemble created by these three hearts protects the business of customers worldwide without a single second of interruption. The unique mission of each hub converges into one, conducting the completed symphony of a global platform.

4-1. Three Hub Strategy

5Core Competitive Advantages – An Unmatched Gap

4-1

Three Hub Strategy

Three Hearts — Asia, Middle East/Africa, and Europe

4-2

Global Supply Chain Competitiveness

An Uncompromising Direct Philosophy & Risk Defense Line

4-3

Quality Management System

6N (99.9999%) Purity — The Crystallization of Perfection

4-4

AI/Digital Supply Chain

Logistics Digital Twin, Predictive Route Design

4-5

ESG Sustainable Management

The Samjogo Spirit of Shared Prosperity — Environment, Social, Governance

AN INIMITABLE GAP

UNICO ENERGY GROUP CO., LTD. infuses technology, sensibility, and trust into the veins of global trade, establishing a new standard for a global integrated trade and energy platform.

4-2 Global Supply Chain Competitiveness

GLOBAL SUPPLY CHAIN COMPETITIVENESS

Global Supply Chain Competitiveness (Unshakable Roots, a Direct Network)

National oil companies / major smelters → UNICO ENERGY GROUP (direct-import line) → customers. Zero intermediary distribution stages — this is why UNICO's supply chain remains unshaken.

1

An Uncompromising 'Direct' Philosophy

Operating direct-import lines by joining hands directly with national oil companies and the Middle East's largest major smelters

2

1st–3rd Lines of Defense

A triple defense connecting sourcing diversification → hedging strategy → AI-based logistics risk control

3

Zero Intermediaries

Zero intermediary distribution stages — this is why UNICO's supply chain remains unshaken

Zero intermediary distribution stages — this is the strength that keeps UNICO's supply chain unshaken

A Sturdy Rope That Never Breaks, Even in the Fiercest Storm

In today's world, where uncertainty — from pandemics to geopolitical conflicts — is higher than ever, countless companies have wept over collapsing supply chains. Yet UNICO ENERGY GROUP's supply chain boasts deep, solid roots that remain unshaken by any storm.

An Uncompromising 'Direct' Philosophy: We do not rely on the veil of complex, intertwined intermediary distribution networks. We join hands directly with the deepest sources of resources themselves — national oil companies and the Middle East's largest major smelters. A transparent, robust direct-import line with no middlemen offers customers overwhelming cost competitiveness, while also providing the 'peace of mind' that resources will always arrive on schedule.

A Multi-Dimensional Risk Defense Line: If you cannot calm the waves (volatility), you must build the strongest breakwater. We absorb the shocks of price volatility and logistics disruption through diversified sourcing channels and a rigorous hedging strategy. So that our customers can focus solely on the essence of their business, UNICO becomes the sturdy shield that bears every risk on their behalf.

Life-line

The Source of Flawless Supply

Secure a stable supply chain through direct imports of crude oil, refined oil, and natural gas, and hedging strategies.

Resources

The Framework of Advanced Industries

Complete the industrial infrastructure foundation through supply chains for A7 aluminum ingots and electrolytic copper.

Structuring Finance for Advanced Materials

Transforming the Capital Market Landscape

Create new liquidity through asset securitization based on 6N ultra-high-purity copper powder.

Business Activity
TRADING &
DISTRIBUTION

Unshakable Roots, a Direct Network

In this era of great transformation, where every boundary in the world is dissolving, we create a new pulse for global industry that goes beyond the simple movement of resources.

Uncompromising Perfection, the Crystallization of Trust

The Persistence of 99.9999% = True Luxury Begins Where No One Is Watching

4-3. Quality Management System

Quality That Guarantees Customer Success

We know that a microscopic defect in even a single component or material can trigger the collapse of a massive robot or AI infrastructure system. Our quality management does not end the moment a product leaves the factory — it continues until the moment the customer's finished product shines out into the world.

1

Incoming Raw Material Inspection → International Standard Cross-Verification

Verification based on certificates of origin and primary component analysis, tolerating not even one part per million of impurity

2

Final Certification Before Shipment → Post-Shipment Quality Tracking

Infinite responsibility, ensuring the 'UNICO label' becomes a guarantee of Quality in world markets, extending through to the customer's finished product

3

A Journey Toward Extreme Purity

General Grade 4N (99.99%) → Industry Standard 5N (99.999%)
→ UNICO 6N (99.9999%)

Quality Management System (Uncompromising Perfection, the Crystallization of Trust)

The Persistence of 99.9999% — True Luxury Begins Where No One Is Watching
The finest trade is not simply handing over goods — it is handing over our honor. UNICO ENERGY GROUP's quality management system is not a mere formality of matching specifications and paperwork. It is our reverent philosophy toward our customers, and a pride we will never compromise.
A Journey Toward Extreme Purity: The ultra-high-purity copper powder we handle — a future advanced material — boasts an extraordinary purity of 6N (99.9999%). This is the result of rigorous verification that does not tolerate even one part per million of impurity. We apply a cross-verification system that exceeds global standards even to a single aluminum ingot (A7) or a single sheet of electrolytic copper, ensuring that the 'UNICO label' itself becomes a guarantee of quality in world markets.
Quality That Guarantees Customer Success: We know well that a minute defect in even a single component or material can trigger the collapse of a massive robot or AI infrastructure system. That is why our quality management does not end the moment a product leaves the factory — it is a process of infinite responsibility that continues until the moment our customer's finished product shines out into the world.

The Journey to Extreme Purity — 6N Ultra-High Purity Copper Powder

6N

99.9999%

Verification allowing
absolutely zero impurity,
not even
1 part-per-million.

Cross-Verification System

- 1 Incoming Raw Material Inspection
Certificate of Origin and 1st Stage Composition Analysis
- 2 International Standard Cross-Verification
Application of a Multi-Verification Process that surpasses Global Standards
- 3 Final Certification Before Shipment
Managed for the UNICO Label to serve as a world-market guarantee.
- 4 Post-Quality Tracking
Unending Responsibility Management up to the point of customer finished product application.

4-4. AI/Digital Supply Chain

AI & DIGITAL SUPPLY CHAIN

Preemptive Value Created by Data

Behind the massive tangible-goods trade that crosses oceans and continents lies a digital revolution, computing millions of times per second. By implanting we have dramatically elevated the intelligence of our supply chain.

1 Digital Twin of Logistics
Learning and analyzing global variables in real time — extreme weather, strait conditions, port congestion, and more

2 Preemptive Value Created by Data
Accurately predicting arrival times before departure and instantly proposing optimal alternate routes

3 Analog Physical Economy + AI
= The Lightest, Most Agile Smart Platform

AI/Digital Supply Chain (The Eyes of the Future, Illuminating an Invisible Path)

Beyond Experience, Toward Intuition — The Optimal Route Proposed by AI
Behind the massive tangible-goods trade that crosses oceans and continents lies an invisible digital revolution, computing millions of times per second. UNICO ENERGY GROUP has dramatically elevated the intelligence of its supply chain by implanting cutting-edge artificial intelligence (AI) and robotics engineering algorithms into a traditional industry.

Digital Twin of Logistics: AI algorithms learn and analyze global variables in real time — extreme weather, shifting conditions in maritime straits, port congestion, and more. We predict the moment of arrival with the utmost accuracy before a vessel even leaves port, and instantly propose the fastest and safest alternate route to avoid unforeseen hazards.

Preemptive Value Created by Data: Intelligent inventory management — analyzing past patterns to forecast upcoming demand and stockpiling at the optimal moment — allows us to lead the market rather than be dragged along by it. The weighty, analog physical economy has evolved into the lightest, most agile smart platform by meeting UNICO's AI.

Digital Twin in Logistics

AI algorithms analyze global variables, including extreme weather, maritime conditions, and port congestion, in real-time. This enables accurate arrival prediction even before a vessel leaves port and immediate suggestions of fastest, safest alternate routes to avoid unexpected hazards.

Real-time Dynamic
Variable Learning

Pre-departure
Arrival Prediction

Instant Optimal
Route Suggestion

A crystallization of faith without choice

99.9999% tenacity = A true masterpiece that starts in the background

4-5. ESG Sustainable Management (ESG SUSTAINABILITY)

Compliance with International Standards for Responsible Resource Sourcing

A true global leader is judged not by the scale of its success, but by the warmth that success leaves behind for the world and the environment. Through responsible resource sourcing that complies with OECD due diligence guidance and RMI international standards, we move beyond profit toward the prosperity of humanity.

1

E · Environment

Expanding the share of low-carbon, eco-friendly energy trading, minimizing the carbon footprint of logistics

2

S · Social

Categorically excluding conflict minerals (3TG) based on OECD due diligence guidance, respecting local labor and human rights

3

G · Governance

Thorough information sharing with global partners and shareholders, transparent governance

The Samjogo (Three-Legged Crow) Spirit of Shared Prosperity in ESG Sustainable Management

A true global leader is not judged solely by the scale of its corporate success. What truly proves our value is the warmth that success leaves behind for the world and the environment. Grounded in the spirit of shared prosperity embodied by the 'Samjogo' (three-legged crow), UNICO ENERGY GROUP practices a warm and responsible ESG philosophy in every moment of business.

Environment (Respect for the Planet): While honoring our past rooted in fossil energy, we boldly expand the share of low-carbon, eco-friendly energy trading to prepare for a green future ahead. We continuously research ways to improve the efficiency of our marine infrastructure to minimize the carbon footprint generated during logistics operations.

Social (The Value of Human Rights and Shared Prosperity): When we set foot on the land of resource-rich nations in Africa and the Middle East, we think not of exploitation, but of coexistence. We categorically exclude 'Conflict Minerals' and adopt only supply chains that guarantee ethical mining, insisting on warm commerce that contributes to the labor rights and prosperity of local communities.

Governance (A Transparent Glass Fortress): Deals made in the dark can never last. By thoroughly sharing information with our global partners and shareholders and establishing a transparent governance structure grounded in perfect compliance, we will walk a path of corporate integrity that we can proudly stand behind before the entire world. View Memo List

E

Environment

Respect for the Planet

Expand the share of low-carbon and eco-friendly energy trading. Minimize the carbon footprint of logistics.

S

Value of Human Rights and Mutual Prosperity

OECD due diligence guidance at the source to exclude conflict minerals (3TG). Adopt ethical mining supply chains to contribute to local labor rights and community prosperity.

G

Governance

Highest Level Corporate Transparency

Global partners' cooperation with thorough transparency. Perpetual transparent governance to ensure a legitimate and respectable corporate goals.

V. FUTURE GROWTH STRATEGY

FUTURE GROWTH STRATEGY

5-1. Eco-friendly Energy Business

5-2 Future Strategic Raw Materials

5-3 Global Investment and Partnership

5-4 Mid-to-Long-Term Vision

A great evolution — one that cares for the planet future generations will inherit, connects the veins of advanced technology that will transform human life, and fuses borderless capital with philosophy as one. A milestone for the dazzling tomorrow UNICO ENERGY GROUP will walk toward.

The future we envision is not about quantitative expansion

Not a dot on a map, but a living global organism — three great hearts

EARTH

5-1. Eco-Friendly Energy Business (Eco-friendly energy business)

An Eco-Friendly Mobility Infrastructure Ecosystem

A great evolution — one that cares for the planet future generations will inherit, connects the veins of advanced technology that will transform human life, and fuses borderless capital with philosophy as one. A milestone for the dazzling tomorrow UNICO ENERGY GROUP will walk toward.

Global EV Bus Market Growth Outlook

Sustained average annual growth rate (CAGR) of approximately 15–18%

From Energy Supplier to Mobility Ecosystem Architect

** Estimated global EV bus market size (in billions of USD, aggregated from Spherical Insights and other sources)*
We are evolving beyond a simple energy trader into an ecosystem architect involved in every stage of how eco-friendly mobility is deployed and operated.

EV Bus & Industrial Electric Two-Wheeler Deployment

We are strategically expanding the deployment of next-generation eco-friendly commercial mobility and the build-out of charging infrastructure, purifying urban air and completing a new standard for a sustainable logistics network.

Improving Urban Air Quality & Standardizing Logistics

We go beyond simply supplying energy to innovate how that energy is consumed, leading the way in building a sustainable urban logistics ecosystem.

5-1.Eco-FriendlyEnergyBusiness

(Eco-friendly energy business)

The Irreplaceable Blood That Powers the Heart of Advanced Industry

By progressively expanding the share of low-carbon transition energy, we complete a balanced portfolio that secures both the stable liquidity of the fossil energy era and the growth potential of the eco-friendly era.

Current Portfolio

Expanding Trading in Low-Carbon Energy Sources

Going beyond our traditional refined-oil-centered portfolio, we are boldly increasing the share of low-carbon transition energy trading — including LNG and biofuels — that dramatically reduces carbon emissions.

Target Portfolio
(Mid-to-Long Term)

The Irreplaceable Blood That Powers the Heart of Advanced Industry

A Warm Step Toward Green Nature
Toward Prosperity Beyond Profit, and a Greener Nature Than Today

The art of building the height of trust and authority

Not a dot on a map, but a living global organism — three great hearts

5-2 Future Strategic Raw Materials

Future strategic raw materials

The 6N Ultra-High-Purity Copper Powder Awakening AI and Robotics

The future's dominant power will not be determined by the volume of data, but by who controls the 'overwhelming material' that turns that data into physical reality. 99.9999% purity copper powder is the perfect blood that connects the micro-circuits of AI semiconductors and humanoid robots.

AI Semiconductors

A Material Connecting the Micro-Circuits of Explosively Growing AI Chips

Humanoid Robots

A Core Conductor for Precision Joint and Actuator Wiring

Next-Generation Aerospace & Superconductors

Guaranteeing Flawless Conductivity Even in Extreme Environments

Securing an Exclusive Supply Chain → Dominating the Foundation of Future Technology

Global Humanoid Robot Market Outlook

High ~38% Compound Annual Growth Rate (CAGR) to 2035 (Goldman Sachs)

* Source: Goldman Sachs Research (2026), Unit: Billion Dollars

Extreme purity that tolerates not even one part per million of impurity is itself competitiveness.

5-3. Global Investment and Partnership

A Virtuous Cycle of Capital Through Multi-Dimensional Financial Structuring

We have moved beyond the one-dimensional approach of simple tangible-goods trading or equity investment. Based on the powerful tangible assets we have secured, we execute convertible bond (CB) matching, block deals, and sophisticated asset swaps with our listed-company partners.

Convertible Bond (CB) Matching

Matching with listed-company convertible bonds based on tangible asset value to create new liquidity

Block Deal

A sophisticated, negotiated capital transfer structure that trades large equity stakes without market shock

Asset Swap

Exchanging tangible assets for financial assets to achieve a value-up with zero cash outflow

A Cash-Outflow-Free Win-Win Ecosystem

UNICO converts tangible assets into financial assets, our partner listed companies secure new liquidity, and both parties complete a massive virtuous cycle of capital without any cash outflow. Top-tier corporate financial engineering — this is the art of capital at UNICO.

A Win-Win Ecosystem with No Cash Outflow

Unico: Real Asset → Financial Asset Conversion	+ Partner Listed Company: Securing New Liquidity	+ Both Parties: No Cash Outflow Great Virtuous Cycle of Capital
--	--	--

We know all too well that no one can cross the ocean alone. UNICO ENERGY GROUP's partnerships transcend the promise of a single contract, rising to the level of a sophisticated financial art that perfectly fuses each other's vision and capital.

A Virtuous Cycle of Capital Through Multi-Dimensional Financial Structuring: We have moved beyond the one-dimensional approach of simple tangible-goods trading or equity investment. Based on the powerful tangible assets we have secured, we execute convertible bond (CB) matching, block deals, and sophisticated asset swaps with our listed-company partners. Through this top-tier corporate financial engineering, we build a magical win-win ecosystem in which both parties generate massive liquidity without any cash outflow.

Cross-Border Strategic M&A and Alliances: For uninterrupted growth, we continuously discover partner companies with premium assets and technological capabilities in global markets. Based on strong succession planning and flexible corporate restructuring capabilities, we elevate our partners' potential to its fullest extent, exponentially expanding our dominance as a comprehensive global platform.

The Art of Capital, Forged by a Union of Trust and Advanced Finance

Top-tier corporate financial engineering — this is the art of capital at UNICO.

Today's step we take becomes tomorrow's path for the entire world.

From the deficiencies of the lowest places to the innovations of the highest, UNICO ENERGY GROUP will be the heart that never stops beating at the center of that great journey.

5-4. Mid-to-Long-Term Vision

A Great Platform That Fills Every Deficiency in the World and Brings the Future Forward

Our ultimate vision is to resolve the resource imbalance that stands in the way of humanity's prosperity, and to be the first to bring the future everyone dreams of into reality.

that have stalled from a lack of energy.

We will breathe warmth into cities

To innovators who have hit the limits of technology,
we will deliver the most perfect materials.

To markets that have contracted,
we will bring liquidity like rain, awakening dormant potential.

Supporting the Advancement of Technology Close to Everyday Human Life

UNICO ENERGY GROUP's ultimate destination is not any particular country on a map, nor a dazzling number on a financial statement. Our ultimate vision is to 'resolve the resource imbalance that stands in the way of humanity's prosperity, and to be the first to bring the future everyone dreams of into reality.'

We will breathe warmth into cities that have stalled from a lack of energy.

We will deliver the most perfect materials to innovators who have hit the limits of technology.

We will bring liquidity like rain to contracted markets, awakening dormant potential.

UNICO ENERGY GROUP will be remembered as the most dynamic and beautiful ecosystem in human history — one that has completely dismantled traditional trading methods of the past and woven together tangible assets and finance, cutting-edge technology and heartfelt trust, as one.

Today's step we take becomes tomorrow's path for the entire world.

From the deficiencies of the lowest places to the innovations of the highest, UNICO ENERGY GROUP will be the heart that never stops beating at the center of that great journey.

VI. INVESTMENT COMPETITIVENESS

Investment competitiveness

6.1 Investment Competitiveness

6-2 Investment Points

(UNICO ENERGY GROUP CO., LTD.)

This material is a presentation for investment attraction purposes. Detailed contract terms and figures are based on actual contracts and disclosure materials.

www.unicoenergygroup.com

6-1. Investment Competitiveness

Absolute Stability + Explosive Liquidity = The Complete Investment Appeal

The combination of 'downside resilience' provided by tangible assets and 'upside expansion' created by financial structuring completes an investment framework with an overwhelmingly favorable risk-return structure.

1

Absolute Stability Rooted in Perpetual Tangible Assets

Oil & Gas (Essential Energy That Never Disappears), Aluminum & Electrolytic Copper (The Foundation of Industrial Infrastructure)

2

Advanced Financial Engineering with Zero Cash Outflow

Leveraging astronomically valuable ultra-high-purity copper powder to drive CB matching and asset swaps

3

Absolute Stability + Explosive Liquidity

= The Complete Investment Appeal — An Overwhelmingly Favorable Risk-Return Framework

Investment is not merely the movement of capital.

Zero Cash-Out Advanced Financial Engineering

We have disrupted the traditional growth method of consuming capital. By using the high-purity copper powder real asset with professional value, secured with Murua Korea, as our weapon, we are aggressively moving forward with convertible bond (CB) purchases and asset swaps with multiple listed companies.

- ✓ Asset Liquidation without Massive Direct Cash Input
- ✓ Generation of Ultra-Large, Immediately Market-Usable Cash
- ✓ Extreme Maximization of ROI (Return on Investment)

Absolute Stability Based on Perennial Real Assets

This is based on strong Physical Assets: energy (oil and gas) that will be consumed as long as global industry exists, and the backbone of advanced infrastructure (aluminum and electric copper). Even in any economic crisis, the intrinsic value of the assets will not diminish, which provides investors with the strongest downward rigidity (safety net).

- Oil & Gas: Indispensable Energy That Never Disappears
- Aluminum & Electric Copper: The Backbone of Industrial Infrastructure
- Preserving Fundamental Value Even In Economic Crises

6-2 Investment Points

BUSINESS REVENUE MODEL

A Three-Tier Multi-Layer Revenue Structure Not Exposed to Single-Point Risk

An Inexhaustible Cash Cow and Exponential Scale-Up

Quantum Leap Layer

New Material Asset Securitization & Strategic M&A

Reinvesting tangible-asset-based liquidity into global blue-chip M&A, securing management control, and new business infrastructure — scaling up through multiplication, not simple addition

Growth Layer

Dominating the Premium Materials Value Chain

Securing a leading position in high-barrier, high-end materials markets such as Grade A electrolytic copper and 6N ultra-high-purity copper powder — creating exclusive premium margins

Base Layer

Direct Trading in Energy & Raw Materials

Directly connected supply chains from Middle East/African origins fully absorb intermediary margins, securing a daily, inexhaustible cash cow based on risk hedging

A perfect revenue ensemble — building high-margin returns on top of stable cash flow, which in turn fuels the explosive multiplication of capital

UNICO ENERGY GROUP's revenue structure is meticulously designed as a three-tier, multi-layer system to avoid exposure to any single point of risk.

[Base Layer] Direct Trading in Energy & Raw Materials (Stable Cash Flow):

Through a direct supply chain connected straight to origins in the Middle East and Africa, we fully absorb intermediary margins. Under a risk-hedging system that offsets global volatility, we secure an inexhaustible cash cow generated daily and continuously from energy and aluminum distribution.

[Growth Layer] Dominating the Premium Materials Value Chain (High-Margin Generation):

Going beyond simple distribution, we secure a leading position in the extremely high-barrier, high-end materials market — including globally standardized Grade A electrolytic copper and 6N ultra-high-purity copper powder — generating exclusive premium margins.

[Quantum Leap Layer] New Material Asset Securitization & Strategic M&A (Explosive Capital Multiplication):

The massive liquidity secured through tangible assets does not simply sit in a vault. We reinvest it into strategic M&A of premium global companies, securing management control, and expanding new business infrastructure — explosively scaling up our asset base through multiplication rather than simple addition.

6-3 Business Revenue Model

MARKET GROWTH POTENTIAL

A New Paradigm Beginning at the Edge of the Market

Global Copper Demand Outlook (S&P Global)

Approx. 50% increase from 2025 to 2040 (28 million tons → 42 million tons)

Exploding demand and limited supply — Those with a monopoly on the supply chain hold the lifeline of future industries.

AI Data Center Power Infrastructure

A 1GW-class AI fab requires approximately 50,000 tons of copper, driving surging annual demand

Humanoid Robots & Superconductors

Increasingly adopted as the core conductor for precision actuator and micro-circuit wiring

Deepening Structural Supply Shortage

Refined copper shortage of approximately 300,000 tons in 2025; new mine development takes an average of 17 years

"A New Paradigm Beginning at the Edge of the Market — At the Center of Explosive Demand"
The market we stand in is like a dormant volcano on the verge of a massive eruption. As long as humanity's technological progress does not stop, the world's thirst for UNICO ENERGY GROUP can only grow exponentially. Ultra-High-Purity Copper Powder, the Fourth Industrial Revolution's 'Irreplaceable Blood': As AI semiconductor micro-fabrication, superconductors that push past physical limits, and the humanoid robotics industry — which connects with humans on an emotional level — take shape, demand for 99.9999% (6N) purity copper powder is truly exploding. This exclusive supply chain, built through our joint venture with Murua Korea, goes beyond simple component supply — it is the single most powerful weapon holding the lifeline of the entire future technology industry.

6-4 Market Growth Potential

GLOBAL COMPETITIVE ADVANTAGE

In an Era of Protectionism and Resource Weaponization, the Value of an Unshakable, Independent Supply Chain Soars

Deepening Protectionism

Resource weaponization and expanding tariff barriers increase uncertainty in global supply chains

The value of independent supply chains surges

Only platforms with an unshakable, direct procurement network survive

UNICO's

Preemptive Positioning

Meeting Both Traditional Energy Stability and Eco-Friendly Transition Demand

Securing Stable Traditional Energy Supply

We reliably meet transitional-period demand by supplying essential energy across all industries without interruption, through direct-import lines of oil and gas.

Meeting Eco-Friendly Transition Demand

Through EV mobility, expanded low-carbon trading, and new-material supply chains, we set a new standard for the carbon-neutral transition.

UNICO's Absolute Framework — The One and Only Global Convergence Platform

Unrivaled Partnership

Exclusive Alliance with Murua Korea

Murua Korea

Combination of Murua Korea's ultra-precision material technology and Unico's vast global distribution network and financial structuring capabilities — the perfect triangle connecting 'Technology-Capital-Market'

Financial Alchemy

Structuring Expertise That Blurs the Lines Between Real Assets and Finance

A unique DNA that establishes asset value through Swiss ISE international certification and connects with domestic national capital markets to close multi-hundred-billion-unit deals without cash outflow

VALUE,
CONNECTED

Where there are people, there is life. Wherever our network reaches, there are people, and there are their lives. We strive to build a healthy society where human rights and fairness thrive.

8-4. GOVERNANCE STRUCTURE

GOVERNANCE

I believe that transparency is the most powerful competitive advantage.

Perfect compliance system

We proactively manage the complex legal risks of global trade and maintain management transparency through a thorough internal control system. All transactions and strategic decision-making comply with global standards.

Responsible leadership and governance

The management team is responsible for the group's governance and makes ethical decisions at every moment to maximize future value. Eliminating information asymmetry and enhancing shareholder value are placed as the top priority of management.

Four Principles of Transparent Management

Proactive management of legal risks

Thorough internal control

Resolving Information Asymmetry

Shareholder value first

A Solid Glass Castle Named TrustGreat companies can never grow in the dark. All our transactions and strategic decisions conform to global standards, which is the surest assurance we offer to our investors and shareholders.

A solid metallic fortress named trust

Great companies can never grow in the dark. All our transactions and strategic decisions conform to global standards, which is the surest assurance we can offer to investors and shareholders.

Closest to anywhere in the world

Wherever Unico Energy Group goes, that is our base. No matter where in the world you are, we are most closely connected to your business.

9-1. HEADQUARTERS AND GLOBAL BASES

GLOBAL PRESENCE

Transcending the boundaries of the world, we are with you closest to you.

1

Global Control Tower (Headquarters)

30th Floor, Trade Center, 511 Yeongdong-daero, Gangnam-gu, Seoul

2

Hub of strategy

It is a space where the value of global energy and advanced materials intersects and financial structuring is completed.

3

Global network hub

It extends beyond Asia to the energy belt of the Middle East and financial infrastructure in Europe..

We work closely with global partners to design the future of a global comprehensive trade and energy platform.
